Profile

I am dedicated to whatever task I am given and I enjoy a challenge. I have exceptional attention to detail and am skilled at prioritizing work. I am highly motivated on showing what I can do.

Education

Women Techsters Fellowship Program cybersecurity, Tech4Dev

2022 Aug – 2023 Mar

I have been passionate about cybersecurity since university, and have never considered anything else but learning more about the field.

Lagos, Nigeria

The cybersecurity fellowship program has given me many opportunities to build technical and soft skills, as well as a mentorship program. In cybersecurity there are many fields to be an expert in, but this program was designed for all who love cybersecurity and related fields. The basics of the program given me networking, cryptography, wireless networking, ethical hacking and the ethics and terms behind them. Beside that our instructor has lots of experience in the work area and he taught as the techniques and methods used by different organizations with hands-on practice. I graduated with high honor from the fellowship program. I am really glad for being part of this program.

Bachelor's degree software engineering,

2019 Sep – 2024 Jul

Addis Ababa Science and Technology University

Addis Ababa, Ethiopia

I'm a passionate software engineer who seeks to gain knowledge and work with the brightest minds. I am experienced and proficient in working with API's, web applications, data structures and designs, and communicating between team members and others. I am always eager to learn new things and take on new challenges.

Professional Experience

Front-end developer, Mereb Technologies

2023 Jul – 2023 Sep

The experience I have had on work environment were very thrilling, I used to interact with different types of persons, this includes software engineers, designers, and product managers which helps me to gain skills and able me to understand better at the job. As a front-end developer, it's my job to translate design into code following best practices established by Google's HTML/CSS Style Guide as well as their JavaScript Style Guide. I have practical experience with React and am familiar with styling frameworks such as Tailwind CSS. Additionally, I have hands-on experience in state management using both Redux and the Context API. I am capable of maintaining a high-level perspective while also focusing on detailed implementation.

Addis Ababa, Ethiopia

IT Trainee, SevenTech Company

It is a remote internship experience. I get collaborated with my colleagues to do different tasks.

Skills

- Time management
- Decision Making
- Successful goal setting
- Developing self-awareness

Extra-curricular Activities

Mentee, Google Developers Students Club (GDSC)

2023 Jan – 2023 Jul
Addis Ababa, Ethiopia

"I think that it is good for me to work in team. Whether you're a designer or a developer, working with others can have the enormous benefit of giving you a fresh perspective. A fresh perspective can be obtained through collaboration. The success of your team will directly depend on how you work in a team. Our team's project was about web application which introduces and communicates innovators and investors by tracking behavioral data on the web. The application will use the data that is collected and then visualized through well designed interface in order to help users with any decision making process. We were able to win the hackathon on first place making as to strive more and got the opportunity to go as intern on a company."

Certificates

Cybersecurity, Women Techsters Fellowship Program

with highest praise

Bootcamp training in Product Design

Ethical Hacking

online self-paced learning
